OMB No. 2050-0190 Expiration Date: 4/30/2006

## **ENROLL US!**

We Want to Be a Partner in EPA's National Partnership for Environmental Priorities

<u>IDENTIFYING INFORMATION</u>	
Name of Organization: Exide Technologies	Facility Name: Vernon
Principal Contact: Thomas Wideman	Title: EHS Manager
Authorizing Official: Carlos E. Pena	Title: Plant Manager
Address: 2700 S. Indiana Street	City/State/Zip: Los Angeles, CA 90023
Phone/Fax: (323) 262-1101 (323) 262-0642	
EPA RCRA ID Number: CAD097854541	Date: <u>6/03/05</u>
PARTNER AGREEMENT	
	onal Partnership for Environmental Priorities. Our goal is to reduce the
	ur products, processes, or releases using techniques such as source
	In this enrollment application, we identify one or more voluntary goals
	e voluntary goal(s) provided below is an initial estimate and may
	the program at any time. If/when we choose to revise our goals or
withdraw from the program, we will notify EPA.	the program we will the same of
F8,,	
GOAL #1. Chemical Name: Lead	CASRN: _7439-92-1
Narrative description of proposed project:	
	rnace slag prior to disposal. Our goal is to reduce the lead content in
the slag by one percent.	
How we will measure success:	
How we will measure success:  We will measure success by conducting weekly in-house blast laboratory.	t furnace slag analysis with quarterly verification by a CA certified
We will measure success by conducting weekly in-house blast laboratory.	reduce the amount of this chemical generated/used from a baseline
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to ramount of375,668pounds inJuly, 2005 (month/year) toJuly, 2007 (month/year).	reduce the amount of this chemical generated/used from a baseline of a reduced amount of246,128 pounds generated/used by
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to ramount of375,668pounds inJuly, 2005 (month/year) toJuly, 2007_ (month/year).  1b. To accomplish this goal, we will use the following source re	reduce the amount of this chemical generated/used from a baseline a reduced amount of 246,128 pounds generated/used by eduction options (check all that apply):
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to a amount of _375,668 pounds in _July, 2005 (month/year) to _July, 2007 (month/year).  1b. To accomplish this goal, we will use the following source re Equipment or technology modifications	reduce the amount of this chemical generated/used from a baseline of a reduced amount of 246,128 pounds generated/used by eduction options (check all that apply):  X Process or procedure modifications.
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to a amount of 375,668 pounds in July, 2005 (month/year) to July, 2007 (month/year).  1b. To accomplish this goal, we will use the following source re Equipment or technology modifications.  Reformulation or redesign of products.	reduce the amount of this chemical generated/used from a baseline of a reduced amount of 246,128 pounds generated/used by eduction options (check all that apply):  X Process or procedure modifications.  Substitution of less toxic raw materials.
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to ramount of 375,668 pounds in July, 2005 (month/year) to July, 2007 (month/year).  1b. To accomplish this goal, we will use the following source re Equipment or technology modifications.  Reformulation or redesign of products.  Improvements in inventory control.	reduce the amount of this chemical generated/used from a baseline of a reduced amount of 246,128 pounds generated/used by eduction options (check all that apply):  X Process or procedure modifications.  Substitution of less toxic raw materials.  X Improvements in maintenance/housekeeping practices.
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to a amount of 375,668 pounds in July, 2005 (month/year) to July, 2007 (month/year).  1b. To accomplish this goal, we will use the following source re Equipment or technology modifications.  Reformulation or redesign of products.	reduce the amount of this chemical generated/used from a baseline of a reduced amount of 246,128 pounds generated/used by eduction options (check all that apply):  X Process or procedure modifications.  Substitution of less toxic raw materials.  X Improvements in maintenance/housekeeping practices.
We will measure success by conducting weekly in-house blast laboratory.  1a. Our voluntary <b>source reduction</b> goal for Chemical #1 is to ramount of 375,668 pounds in July, 2005 (month/year) to July, 2007 (month/year).  1b. To accomplish this goal, we will use the following source re Equipment or technology modifications.  Reformulation or redesign of products.  Improvements in inventory control.  Other (describe):	reduce the amount of this chemical generated/used from a baseline of a reduced amount of 246,128 pounds generated/used by eduction options (check all that apply):  X Process or procedure modifications.  Substitution of less toxic raw materials.  X Improvements in maintenance/housekeeping practices.
We will measure success by conducting weekly in-house blast laboratory.  1a.
